About Izvestia

Izvestia served as the paper of record—the official daily newspaper—of the Soviet government from 1917 until the dissolution of the USSR in 1991, when Izvestia became an independent publication.

During the February Revolution of 1917, Izvestia was first issued on February 28, 1917, in Petrograd (now St. Petersburg) and was the main newspaper of “The Petrograd Soviet of Workers’ and Soldiers’ Deputies”. At the time, Izvestia had a moderate and generally positive leaning toward other liberal opposition groups. After the October Socialist Revolution, Izvestia passed into the hands of the Bolsheviks. When the new Soviet government transferred the capital to Moscow, the newspaper was relocated as well.

Izvestia was the chief organ of the Soviet state to inform the public of government policies. Izvestia was also recognized for its extensive international coverage, having correspondents in more than 30 foreign countries. This also made the paper an important channel for Soviet foreign policy.

Continuously published for over 90 years, Izvestia’s prominence endures today as one of the most subscribed news sources of contemporary Russia. It now covers domestic and foreign policy, commentary, culture, education, and finance.
Today’s Researchers Have Access to a Rich Historical Repository

Researchers of language, history, international relations, economics, social sciences, and more have access to a rich source of Russian documentary history from one easy search. Izvestia Digital Archive delivers unprecedented access to a repository chronicling the dramatic transformation of Soviet society, from Izvestia’s beginnings as the official publication of Lenin’s revolutionary contemporaries to its status as the official publication of the Supreme Soviet of the USSR.

From the first day of publication in February 1917, Izvestia published first-hand accounts of events that shook the world, from the Russian Revolution, the liberation of Nazi concentration camps, Sputnik, and the fall of the Berlin wall.

During the Soviet era, Izvestia was less ideologically vocal than official party newspapers. The newspaper also played a real role during the Khrushchev era “Thaw” when the paper’s editors advocated de-Stalinization and reform.
