

## NEW, UPDATED INTERFACE!

# Russia's World of Print

## *Russian National Bibliography*

If you subscribe to or use Russian national bibliographic periodicals (often called "letopisi") in print, you know the challenges of searching different indexes, each with its own set of back issues and volumes, to assemble all relevant citations.

Now you can digitally search the most comprehensive bibliographic product of Russian works. In cooperation with the Russian Book Chamber, East View has digitized the Russian national bibliographies going back to 1993 and made them searchable in an online database: ***East View's Universal Database of Russian National Bibliography (UDB-BIB)***.

Online access to electronic Russian bibliographic records opens valuable content in a completely new way. Improved access to these authoritative records will facilitate research in Slavic studies and can potentially lead to increased usage of library collections.

### Coverage
