AcademicFocus (AF) is a comprehensive resource of English-language content from China, including original English-language academic journals published in mainland China, select content from top Chinese academic journals translated into English, and English-language proceedings from conferences held in mainland China, providing professional readers with Chinese academic viewpoints and scientific research findings beyond the research of other common databases. AcademicFocus compiles China's foremost social science and STM achievements in English for overseas enterprises, colleges, and academic research institutions, all available via an intuitive English-language user interface.

- In the humanities and social sciences, AcademicFocus collects journals sponsored by top Chinese universities and government think tanks such as the Chinese Academy of Social Sciences, and provides first-hand research materials about modern Chinese studies, traditional Chinese culture, and Chinese scholars' views on international issues.
- With topics concerning science and technology, AcademicFocus includes journals sponsored by the Chinese Academy of Sciences, China Association for Science and Technology, and top universities of science and technology, helping readers keep abreast of cutting-edge Chinese fundamental research, basic applied research, and advanced engineering technologies.
- AcademicFocus features professional editing and intelligent push for new and relevant content, making research more effective and efficient.
