Language:	Chinese
Interface:	English + Chinese
Archive:	1981-present
Images:	Over 2.2 million
Updates:	Continuous
Data Format:	PDF images
Producer:	Tongfang Knowledge Network Ltd. (TKN)

CNKI 中国知网
www.cnki.net
中国知识基础设施工程

Platform:	CNKI

AcademicImage (CAI) provides scholars with one-stop access to academic images relating to Chinese history, geography, literature, art, philosophy, religion, culture and education. Users can start their research with an image, find relevant research interests and explore links to related documents. CAI comprises images from China Academic Journals (CAJ) and from China Reference Works Online (CRWO). Images are academically and accurately classified based on their features, literature keywords and caption keywords, and include links to the source literature.

Content

At present, AcademicImage includes over 2.2 million images from CAJ (1994-2019) and over 750,000 images from CRWO (1981-2019). CNKI will continue to add new images as they become available in CAJ and CRWO; approximately 200,000 images are expected to be added annually.

CAI AcademicImage

Navigation

- The platform features "Popular Images" and "Hot Knowledge" sections on the main page that provide suggestions on interesting topics.

- Users can also browse by four disciplines and 34 sub-disciplines:

Literature & Art	Culture & Education	History & Geography	Politics & Economics
Literature Theory	Philosophy and Religion	History of China	Marxism
Chinese Language	Ethics	Ancient Chinese History	Military and Security
Foreign Language	Demography and Statistics	Modern and Contemporary Chinese History	Chinese Politics and International Politics
World Literature	Aesthetics	World History	Economics
Dancing and Music	Ethnonymics	Chronicles of Nationalities and Local Chronicles	Trade Economy
Drama and Film	Education	Biography	Industrial Economy
Art and Calligraphy	Physical Education	Archaeology	Agricultural Economy
	Management	Geography	Tourism and Culture Economy
			Finance and Investment
			Accounting and Auditing

Search

- Users can search by keywords (basic and advanced). Advanced search supports keywords, publication date, subject, image category, image size, and source database.

- Search results can be filtered according to color, subject, year of publication, keyword, and type, or sorted according to relevancy, image size, publication date, information content and definition.

- Users can download multiple images at once from search results, compare up to three images at once, and rotate or zoom in on images.

- **Note:** AcademicImage is not cross-searchable with other CNKI databases but does include links to literature found in CAJ and CRWO, allowing CAJ and CRWO subscribers to seamlessly download relevant full-text articles.

China Research Gateway (CRG) presents the full spectrum of Chinese research, with exhaustive representation of STEM, social science, and humanities disciplines. Featuring an unparalleled breadth of sources, including scholarly journals, monographs, statistical publications, government documents, newspapers, dissertations, conference proceedings, patents, and many other content types, CRG offers a centralized means for discovery and access to this rich trove of research, specifically tailored to serve the needs of North American scholars and institutions.
