中国知识基础设施工程

Platform:	CNKI

China STM Select Journals (CAJX) presents the premier academic journals from China in all areas of the exact sciences, including Biology, Chemistry, Mathematics, Engineering, Geology, Physics, and all related subdisciplines. More than 550 titles are presented, including titles that have been designated by Peking University as Core journals (recognized as particularly outstanding in their field), with coverage of over 150 disciplines and sub-disciplines.

China STM Select Journals is an integral part of the larger CNKI product suite, with the same features and functions of its parent product, China Academic Journals (CAJ). By contrast, China STM Select Journals offers a streamlined focus on the exact sciences alone, for users not seeking content from humanities or social science disciplines.

CAJX China STM Select Journals

Content

■ Content in CAJX covers over 150 disciplines and sub-disciplines, including:

Animal Husbandry and Veterinary Medicine	Geophysics	Physical Geography and Surveying and Mapping
Automation Technology	Horticulture	Physics
Biology	Metal Science and Metal Technology	Power Industry
Building Science and Engineering	Mining Engineering	Preventive Medicine and Hygiene
Environmental Science and Resource Utilization	Oil and Gas Industry	Radio Electronics
Forestry	Organic Chemistry	Water Resources and Hydropower Engineering
Geology	Pharmacy	Weapon Industry and Military Technology

Features and Functions

■ **Multiple navigation methods:** Supports navigation by subject, online-first, citation index databases, publication frequency, journal honors, core journals, sponsors, and more.

■ **Robust search methods:** XML fragmentation technology improves search efficiency and accuracy through multiple search methods, including quick search, basic search, professional search, author search, source search, fund search, sentence search, and search in results. Chinese-English cross-language search is supported.

■ **Numerous search fields:** Users can search multiple fields, including: subject, title, keywords, abstract, author, first author, author affiliation, journal title, reference, full text, year, issue, DOI, China Library Classification (CLC) code, ISSN (where available), and CN.

■ **Sorting and grouping:** Horizontal grouping of search results by subject, title, fund, research level, author, author affiliation, and keywords. Sort by publication date, relevance, cites, and downloads.

■ **Knowledge networks:** CNKI's Knowledge Network Node displays a network of citations, similar articles, similar subjects, related funding articles, author affiliations, and more to enhance research and efficiency.

■ **Online-first and exclusive publications:** CAJX features numerous online-first journals which publish 3-6 months earlier than the print edition, as well as titles that are exclusive to CNKI databases.

■ **Downloads:** The CAJ platform provides two download formats: CAJ download and PDF download.

China Research Gateway (CRG) presents the full spectrum of Chinese research, with exhaustive representation of STEM, social science, and humanities disciplines. Featuring an unparalleled breadth of sources, including scholarly journals, monographs, statistical publications, government documents, newspapers, dissertations, conference proceedings, patents, and many other content types, CRG offers a centralized means for discovery and access to this rich trove of research, specifically tailored to serve the needs of North American scholars and institutions.
