CHKD at a Glance

Language:	Chinese
Interface:	Chinese
Abstracts:	Chinese
Archive:	1915-present
Titles:	1,654 medical journals, 740,000 dissertations, 1.6 million conference papers
Updates:	Daily
Data Format:	Full text
Producer:	Tongfang Knowledge Network Ltd. (TKN)  中国知识基础设施工程
Platform:	CNKI

Chinese Hospitals Knowledgebase (CHKD) is a comprehensive database offering a centralized data discovery and retrieval experience across a broad range of resource types and subjects related to medicine and hospitals. CHKD provides unified searching across multiple resource types, including journals, dissertations, conference proceedings, reference works, standards, newspapers, and more.

CHKD integrates bibliographic information including abstracts of Chinese Medical Association journals, as well as major western medical databases such as PubMed, Medline, AMA, AACR, Ovid, and journals published by Elsevier and Springer, supporting convenient analysis of both Chinese and foreign literature, with links to the full text for open sources. Meanwhile, Intelligent Search enables users to input a search term and it will correspond to the right medical term with a reference to the Medical Specialties Subject Classification Intelligent System, generating more accurate and complete search results across all resources.

CHKD covers a wide range of medical subjects, including clinical medicine, preventive medicine, Chinese medicine, infectious diseases, cardiovascular disease, surgery, oncology, gynecology, pediatrics, pharmacy, and more. The database also covers related subjects, such as bioscience, law, management, economics, and education, and includes an Open Access collection on the novel coronavirus.

Navigation

CHKD provides multiple navigation options:

- Lists of recommended journals and top 10 downloaded articles
- Top-level navigation to resource types, the Applied Medicine database (LCZL), military medical journals, practical clinical medicine journals, Chinese medicine journals, and journal collections from the Chinese Preventive Medicine Association, Chinese Pharmaceutical Association, and Chinese Medical Doctor Association.
- Easy navigation to collections on numerous subjects, including: novel coronavirus (OA collection), clinical diagnosis, ophthalmology, diabetes, traditional Chinese medicine, pediatrics, mental health, cardiovascular disease, oncology, orthopedics, plastic surgery, oral science, and infectious diseases.
- Navigate by resource, including journals, dissertations, conference proceedings, newspapers, bibliographic records for foreign journals, yearbooks, patents, standards, Applied Medicine database, traditional Chinese medicine materials, medical picture library, BioMed Central, and PubMed.

CHKD Chinese Hospitals Knowledgebase

Content

CHKD includes a wide range of resources, including:

■ Journals

- Over 1,650 current medical-related complete journals
- Over 690 archive publications
- Most date to inaugural issues, with earliest dating back to 1915
- Includes online-first and exclusive titles
- Navigation by subject, statistical source, core journals, database source, journal honor roll, issues, place of publications, organizer, and issuing system
- Cover numerous subjects, including: preventive medicine, hygiene, Chinese medicine, clinical medicine, internal medicine, surgery, obstetrics and gynecology, pediatrics, oncology and special medicine, pharmacy, management, and foreign language learning

■ Dissertations

- Includes papers from over 520 top universities, the Chinese Academy of Science, and national laboratories
- More than 740,000 documents, with annual updates of over 30,000 documents
- Covers subjects such as: basic medicine, clinical medicine, preventive medicine, Chinese medicine, pharmacy, special medicine, biological science, business management, library information, computer and application, medical education, foreign language learning, and other disciplines

■ Yearbooks

- Nearly 3,000 medical and health-related resources in nearly 25,000 yearbooks, published officially in China from 1912 to the present

■ Conference Proceedings

- Over 1.6 million articles with annual updates of approximately 90,000 articles
- Content is from well-known and respected conferences hosted in mainland China

Search

- Advanced, professional, author, sentence, and medical subject
- Cross-database search provides one-stop search for multiple types of resources, including journals, dissertations, conference proceedings, newspapers, yearbooks, standards, patents, books, reference works, bibliographic records for foreign journals, and more.
- Advanced search allows for subject search and condition control, sorting by impact factor, and full text jump to original link.
- CHKD makes use of MCI (Medical Specialties Subject Classification Intelligent System) subject terms vocabulary, which links all different expressions of the same concept, such as synonyms and similar words, into a single standard searching term (subject term). The result is more accurate and complete search results.

China Research Gateway (CRG) presents the full spectrum of Chinese research, with exhaustive representation of STEM, social science, and humanities disciplines. Featuring an unparalleled breadth of sources, including scholarly journals, monographs, statistical publications, government documents, newspapers, dissertations, conference proceedings, patents, and many other content types, CRG offers a centralized means for discovery and access to this rich trove of research, specifically tailored to serve the needs of North American scholars and institutions.
