## Features and Functions

- Resources are selected based on strict standards, taking into account factors such as readership, editing quality, and publishing policy.
- Resources are updated in a timely manner, with hundreds of articles updated daily.
- Search by journal title or browse by category. CJFU also displays featured content by theme and the latest articles on popular topics.
- CJFU features multiple reading modes: View the full image of an article on the platform, or download the online reader for a more realistic reading experience. The online reader simulates browsing of the whole issue, replicating the original pages and allowing for easy navigation between articles, with an intuitive interface and comprehensive functions such as search, text recognition, copying and printing. Articles can also be downloaded in CAJ or PDF format.
- Articles include section of recommended related articles to facilitate deeper research.

**China Research Gateway (CRG)** presents the full spectrum of Chinese research, with exhaustive representation of STEM, social science, and humanities disciplines. Featuring an unparalleled breadth of sources, including scholarly journals, monographs, statistical publications, government documents, newspapers, dissertations, conference proceedings, patents, and many other content types, CRG offers a centralized means for discovery and access to this rich trove of research, specifically tailored to serve the needs of North American scholars and institutions.
