China Economics Journals (CJFY) is China's largest economic information journal intelligence data warehouse, providing users with an authoritative information retrieval system and analysis platform for micro and macroeconomic data and analysis reports. Since 1979, CJFY has covered various economic fields and industries such as the world economy, macro economy, regional economy, finance and insurance, medicine and health, and real estate. The platform features standardized descriptions, indexing and in-depth processing for a comprehensive collection of content from over 190 economic information journals, and more than 4,000 similar documents from other publications, such as industry analysis reports, research reports by well-known think tanks at home and abroad, market information, corporate dynamics and other types of financial intelligence. CJFY provides an advanced retrieval system, and through advanced knowledge integration technology, provides value-added services such as content links, which provides a systematic and comprehensive service for enterprises, industry associations, government departments at all levels, various economic research institutions, and the general public.

CJFY China Economics Journals
