China Conference Proceedings (CPCD-CPFD) is the most comprehensive full-text database of proceedings from national conferences in China. It provides access to the full spectrum of academic discussion in China's premier institutions, delivering information from meetings of academic institutions, industrial organizations, governmental agencies and international bodies. Through its partnerships with over 10,500 academic societies and associations, CPCD-CPFD includes over 2.8 million papers from over 20,000 conference proceedings (with some going as far back as 1953), accounting for more than 90% of all national-level conference proceedings. CPCD-CPFD offers robust navigation and search tools, and provides expanded information for each paper, including links to similar documents, documents from related authors and institutions, and documents on related subjects.

CPCD-CPFD | China Conference Proceedings

Content

- China Conference Proceedings includes compete coverage of proceedings from major domestic conferences:
  - Over 2.8 million papers from over 33,000 conference proceedings
  - Publications start from 1999, with some dating back to 1953
  - Partnerships with over 10,500 academic societies and associations
  - Inclusion rate of literature is as high as 95%
  - Continuous updates with approximately 100,000 new proceedings added annually

Features and Functions

- **Navigation:** Supports browsing by conferences, proceedings, sponsors, specialties (subjects), industries, parties and administrations.

- **Search:** Offers quick, basic, professional, scholar, fund, sentence, and source searches, as well as searching within proceedings. Users can search multiple fields, including subject, title, keywords, abstract, full text, proceeding title, references, China Library Classification (CLC) code, author, first author, institution, and conference date, name, level, sponsor, and contributor.

- **Grouping and sorting:** Group results according to subjects, organizers, research level, authors, agencies, and more.

- **Knowledge network:** CNKI's Knowledge Network Node provides expanded information for each paper including citation network, similar documents, documents from related authors and institutions, and documents on related subjects.

- **Comprehensive content:** The inclusion rate of national-level conference papers is higher than 90%, and the the inclusion rate of designated "important" conference papers is 95%. Proceedings of important and continuous conferences are all collected, with papers from some continuous conferences dating back to 1953.

- **High quality content:** Proceedings from conferences of well-known organizations, key national laboratories, and major national research projects.

- **Fast updates:** China Conference Proceedings works closely with academic associations so that content is updated online no more than one month after a conference has occurred.

China Research Gateway (CRG) presents the full spectrum of Chinese research, with exhaustive representation of STEM, social science, and humanities disciplines. Featuring an unparalleled breadth of sources, including scholarly journals, monographs, statistical publications, government documents, newspapers, dissertations, conference proceedings, patents, and many other content types, CRG offers a centralized means for discovery and access to this rich trove of research, specifically tailored to serve the needs of North American scholars and institutions.
