China Scholars and Experts (CSD) is the most comprehensive and complete scholar information query tool in China. It provides detailed and objective profiles for over 34 million domestic and foreign experts and scholars in all disciplines, including natural sciences, engineering technology, agriculture, philosophy, medicine, humanities and social sciences. Incorporating data from multiple CNKI databases, including China Academic Journals (CAJ), China Doctoral Dissertations/Master's Theses (CDMD), and China Conference Proceedings (CPCD), CSD is a powerful tool for the analysis of academic research in China.

Scholar profiles in CSD contain a wealth of data, including basic information (personal profile, research direction, resume, etc.) and academic output (journal papers, dissertations, conference papers, patents, scientific research projects, etc.). Profiles may also include a summary of academic achievements, as well as a scholar's academic influence analysis, academic network, and current status of research in their respective field. CSD also features over 160,000 "famous expert" profiles, which include scholars from high-ranking institutions and recipients of various awards and honors.

CSD | China Scholars and Experts

Content

- CSD contains profiles for more than 34 million scholars, including over 160,000 detailed profiles for "famous expert" scholars, such as academicians of the Chinese Academy of Sciences and the Chinese Academy of Engineering, members of the Chinese Academy of Social Sciences, and recipients of various awards and honors from state and central ministries and commissions.

- Utilizes the Published Contributor Name Identifier (PCNI) system, a registration management system that creates unique identifiers for global authors, helping to effectively distinguish between scholars with the same name and to accurately locate scholars.

- Data in CSD comes from a number of CNKI resources, including China Academic Journals (CAJ), China Doctoral Dissertations/Master's Theses (CDMD), China Conference Proceedings (CPCD-CPFD), International Conference Proceedings (CPCD-IFPD), China Core Newspapers (CCND), and China Standards (SCSF). CSD is updated weekly using new material added to these resources, with an estimated 1.5 million scholar and expert profiles added annually.

- **Search:** Offers quick and advanced search options. Users can select from among 10 research fields and search multiple fields, including name, PCNI, unit, keywords, research direction, fund, number of posts, number of core posts, cited frequency, h-index, and g-index.

- **Navigation:** Browse by first letter of a scholar's name, first letter of an institution, and by 10 research fields and 168 subjects. Group and sort results by number of posts, cited frequency, h-index, g-index, and number of core posts.

Features

- Provides detailed and objective homepages for scholars: CSD provides scholars with an objective and detailed academic homepage, including basic information (such as personal profile, research direction, resume, research focus, etc.), academic output (including journal papers, dissertations, conference papers, books, patents, scientific research projects and other academic documents), academic influence, academic relationship network and current research status in their respective field.

- Applies visualization technology to analyze the academic research of scholars: The application of visualization technology visually and intuitively reveals the academic influence and academic relationship network of scholars, analyzes the academic research situation of scholars in multiple dimensions and levels, and at the same time shows the current status of the research frontier in the scientific research field of the scholar based on comprehensive academic indicators.

- Assists in decision-making for scientific research management or personnel departments: CSD collects all the scholar data of the institution, based on the quantitative analysis data of these objective academic achievements, assists the scientific research management department or the personnel department to evaluate scholars in the institution from multiple angles.

- Provides scientific and objective selection criteria for recruitment of experts and industry talents: CSD provides a series of academic indicators and objective description information to assist in the selection of subject experts and the search for industry talents. For example, inquire about popular advisors, find doctors who excel at a certain medical field, select appropriate experts for scientific research project establishment or evaluation, and recommend appropriate review experts or topic selection experts for publishing institutions.

China Research Gateway (CRG) presents the full spectrum of Chinese research, with exhaustive representation of STEM, social science, and humanities disciplines. Featuring an unparalleled breadth of sources, including scholarly journals, monographs, statistical publications, government documents, newspapers, dissertations, conference proceedings, patents, and many other content types, CRG offers a centralized means for discovery and access to this rich trove of research, specifically tailored to serve the needs of North American scholars and institutions.
