China Statistical Yearbooks

中国经济社会大数据研究平台

CSYD at a Glance

Language:	Chinese
Interface:	English + Chinese
Abstracts:	Chinese
Archive:	1949–present
Titles:	Nearly 3,000
Volumes:	Over 30,000
Updates:	Continuous
Data Format:	PDF, article-based; XLS for tabular data
Producer:	Tongfang Knowledge Network Ltd. (TKN)  中国知识基础设施工程
Platform:	CNKI

China Statistical Yearbooks (CSYD) is the largest and most authoritative statistical database in China. It contains all key statistical yearbooks published in mainland China, covering various types of census and survey data including analysis reports, statistical summaries, investment material, and data compilations. Content in CSYD is classified by 18 industries, 40 districts and 6 types of documents, and covers a wide range of economic, social, and environmental topics.

CSYD contains nearly 3,000 authoritative statistical titles issued by the central government, provinces and cities since 1949, over 30,000 volumes total, including all continuously published statistical yearbooks in China (approximately 150 titles). Content is in Chinese, with many headings and tables of contents translated into English. CSYD offers convenient ways to access data: users can view current and retrospective content, navigate by district or other administrative unit, and search by index value or table. Powerful data mining analysis tools allow users to compare districts, indexes, and years to analyze single or multiple indexes, with customized reports and tables available for download.

CSYD China Statistical Yearbooks

Content

- CSYD includes nearly 3,000 authoritative statistical titles issued by the central government, provinces and cities since 1949:
 - Over 30,000 volumes of statistical yearbooks, including all continuously published statistical yearbooks in China (approximately 150 titles)
 - Over 33 million entries
 - Resource types includes statistical yearbooks, analysis reports, investigation data, general survey data, statistical summaries, and compilations
- CSYD provides full coverage of data in all industries. Content is classified according to 18 industries:

General	Finance	Transportation, Post and Telecommunications
System of National Accounts	Natural Resources, Energy and Environment	Domestic and International Trade
Fixed Assets Investment	Politics, Law, and Public Administration	Tourism and Catering
Population and Human Resources	Farmers, Agriculture and Rural Areas	Education, Science and Technology
Livelihood and Prices	Industry	Culture and Sport
Enterprises and Public Institutions	Construction and Housing	Medicine and Health Care

Features

- **Navigation:** Content is classified by 18 industries, 40 districts and 6 types of documents (statistical yearbook, analysis report, compilation, investigation data, general survey data, and statistical summary).
- **Search:** Features item search, professional search and index definition. Search fields include the yearbook title, year coverage, district of index, index title, index category, entry title, and full text. In addition, users can search by a numerical value, meaning a user can search exact figures cited by other researchers.
- **Data analysis:** Intelligent mining of index titles, years, districts and numeric values, and massive data extraction across various tables, chapters, and yearbooks allows for comprehensive data analysis and comparative analysis of regional development according to different subjects. Presents detailed index data reports and related analysis graphics that can be directly exported into Excel or Word.
- **Personal statistical data management:** Logged in, any user can create a personal statistical database, which can be compiled through batch import of data from Excel.
- **Single yearbook display:** Basic information and complete content are presented for each individual yearbook. Users can choose to download any chapter or chart, as well as search within the yearbook.
- **Viewing and downloading:** Articles may be viewed in PDF, and statistical charts and tables may be downloaded and saved in Excel.

China Research Gateway (CRG) presents the full spectrum of Chinese research, with exhaustive representation of STEM, social science, and humanities disciplines. Featuring an unparalleled breadth of sources, including scholarly journals, monographs, statistical publications, government documents, newspapers, dissertations, conference proceedings, patents, and many other content types, CRG offers a centralized means for discovery and access to this rich trove of research, specifically tailored to serve the needs of North American scholars and institutions.
