# EAST VIEW GLOBAL GEOGRAPHY LIBRARY

# A World of Geospatial Resources at Your Fingertips

Research • Explore • Analyze

**Global Geography Library (GGL)** is a digital platform designed to address the challenges of storing and accessing large format materials such as atlases and charts, or large physical collections like national mapping series. With GGL, users can access a diverse collection of maps, charts, explanatory notes, and related materials – both in copyright and non-copyright – covering various geographical regions, time periods, and categories.

GGL simplifies access to these materials by offering an easy-to-use, searchable platform for research and discovery, with the ability to integrate content into GIS systems via WMTS for further analysis. The platform can also be utilized for custom projects and collections via East View's GGL+ program – please inquire for more details.

# Why Choose Global Geography Library?

**Save Time, Effort and Shelf Space**: Extensive collections, aggregated for easy access, all in one place.

**Cost-Effective**: High-quality content at a fraction of the cost, without the need for in-house physical storage or digital management.

**Flexible Purchasing:** Subscription or one-time purchase options to fit your needs.

**Digital Access:** IP authentication with 24/7 access for unlimited simultaneous users.

**Custom Preservation & Hosting:** Preserve and expand access to your own materials with our customized GGL+ program.

## **GGL** Features

- » User-friendly interface
- » Powerful searching capabilities
- » Cross-referencing and related resources
- » Dynamic index maps for spatial discovery
- » High-res viewing with IIIF technology
- » Seamless mosaics of map series

- » GIS integration via WMTS
- » Detailed item-level metadata
- » Permanent URLs
- » Citation generator
- » Usage statistics
- » MARC records available

# EAST VIEW GLOBAL GEOGRAPHY LIBRARY

## **GGL Collections**

GGL offers collections from across the globe, with new collections constantly being produced. Content types include digital (raster) maps and charts, GIS vector data, mosaics, index maps, explanatory notes, terrain reports, atlases, and more.

GGL collections are organized into several different families:

#### Aeronautical

Includes charts, flight information publications, and other aviation navigational content, with select series offering authoritative worldwide coverage.

#### **Atlases**

Features a cover-to-cover digital atlas experience, hi-res viewing options, and full text searchability.

### **Earth Sciences**

Includes maps, explanatory notes, and other accompanying reports and documentation.

#### **Maritime**

Includes nautical charts, publisher catalogs, and other maritime navigational content.

### **Terrain Analysis Reports**

Includes 1:200,000 scale topographic mapping, soil diagrams, reports (native language and English translations), and accompanying e-books.

## Thematic, Reference, Commercial, Educational

Offers complete collections from world-renowned map publishers, covering a wide variety of topics including travel, hiking, education, general references, etc.

### Topographic

Features full text searchability (where available) and hi-res viewing option. Vector data is also available for select collections.

#### GGL+

Fully customizable platform solution for customers wanting to digitize and platformize their own materials, with the option to add any of East View's pre-built collections.

For information on available GGL collections contact us at **info@eastview.com** or visit **www.eastview.com/ggl**. If there is a specific country and/or map series you are interested in please contact us to discuss availability and status.
