OVERVIEW AND BACKGROUND

The fifth decennial census in Bangladesh was conducted from March 15 to 19, 2011. The European Union, U.S. Census Bureau, U.S. Agency for International Development, and UNFPA provided financial and technical support. Intelligent Character Recognition, Integrated Computer Assisted Data Entry, and CSPro were new technologies implemented for this census. A post-enumeration check carried out by the Bangladesh Institute of Development Studies, an independent organization, found a net undercount of 3.97%, down from 4.98% in 2001. The enumerated population was 144,043,697, and the adjusted population was 149,772,364.
