

GIS Edition

IRAN / ایران, IRĀN 2011 CENSUS

- 75% population coverage
- 1,427,268 data points
- ADM 4 for 4,299 census units
- 332 census variables

More than numbers. Census data provides unparalleled insight into the lives of individuals. East View presents the Iran 2011 Census as part of the East View Global Census Archive® (GCA). The Iran 2011 Census addresses a wide range of topics at the highest level of detail possible.

Making information available. When initially acquired, the census data is stored in a complex database structure, with attribute descriptions in Persian, limiting access to those with significant database management and programming experience. East View simplifies access, formatting the collection into an easy-to-use geodatabase which can be visualized using any GIS software and providing a comprehensive guide. Additionally, East View provides the original census documentation, allowing researchers to see first-hand how the data was gathered.

CENSUS OVERVIEW

Year: 2011	Polygons at ADM: 4,299
ADM Level: 4	Number of Questions: 27
Population Coverage %: 75	Number of Answers: 332
Geography Coverage %: 1.4	Data Points: 1,427,268
Smallest Geography Name: Dehestan/Shahr	Urban/FG: Urban

Notes

- Population Coverage % indicates the percentage of total population of the country during the census year that this census covers
- Geography Coverage % indicates the percentage of the total area of the country covered by the ADM polygons in this census
- Urban/FG indicates if this census provides Full Geographic (FG) coverage or if coverage is limited to Urban (U) or populated places

DELIVERABLES

The Iran 2011 Census has 75% population coverage, over 1.4 million data points, and consists of:

Geodatabase

- Intuitive organization of census data
- Administrative boundary vector data at ADM 4 (Dehestan/Shahr) for 4,299 census units
- Vector and aggregated tabular data at the Dehestan/Shahr level

Shapefiles

- All vector and census data in ESRI Shapefile format

Census Guide

- Detailed descriptions for up to 332 census variables

Original Census Documentation

- Delivered in source format

Metadata

- Full attribute level metadata in FGDC ISO format

ADM 4/3/0 boundaries for all of Iran; area in red dotted circle (various dehestans/shahrs in Fars province) is available as sample data
