INDB FinderPro

Comprehensive economic statistics database from Japan

INDB FinderPro offers over 400,000 statistics about Japan in tabular, downloadable formats. The Japanese-language platform contains data points from over 150 ministries, associations, and industry specialists, ranging from the Ministry of Land, Infrastructure, Transport, and Tourism to the Japan Tobacco Association. INDB FinderPro boasts over 70 areas of data collection, from Judicial Statistics to Dining-out Industry Market Trends. With data back to 1900, the database offers a comprehensive view of Japanese life in statistical form.

INDB FinderPro Benefits

- Easily acquire and analyze economic statistics data
- Provides access to historical data that is no longer publicly available and statistics that are currently difficult to access, as well as data published in non-digital formats
- Reduce the effort of regular data collection and updates
- Easily perform year-on-year comparisons/period changes

Overview of Data Included in INDB FinderPro

Macro Statistics

Comprehensive
A wide range of major domestic economic statistics are included, such as: business indicators, national economic accounts, production activities, corporations, trade and balance of payments, labor, prices, household and consumption, finance, public finance, old standards, and more.

Financial Statements Statistics of Corporations by Industry (Quarterly)
From the “Quarterly Financial Statements Statistics of Corporations by Industry” published by the Ministry of Finance, balance sheet and income statement data are recorded by industry and size. The producer has reprocessed “Fund Management Statement Items” for inclusion in the database as well.

Financial Statements Statistics of Corporations by Industry (Annual)
The annual report category includes a finer breakdown of companies by capital size than the quarterly report category, as well as items that can only be found in the annual report category.

Family Income and Expenditure Survey Price Index
From the “Family Income and Expenditure Survey Report (Household Economy Chapter – Households of Two or More Persons)” published by the Ministry of Internal Affairs and Communications, income and expenditure data by region, income category, and household size are included. Other statistics related to household finances are also included.

Price Index
“Corporate Goods Price Index,” “Consumer Price Index,” “Services Producer Price Index,” “Input- Output Price Index of

Manufacturing Industry by Sector," "Urban Land Price Index," and "Official Land Price" are included.

Tankan (Bank of Japan's Short-Term Economic Survey of Enterprises)
Detailed data from the "Tankan (Short-Term Economic Survey of Enterprises)" published by the Bank of Japan is included, such as capital stock standards and old regular employee number standards.

Semi-macro Statistics

Industry (Industry Statistics)
Covering over 190 sources from industry association statistics, government statistics, etc., this data is compiled according to the standard industrial classification and includes production, shipment, inventory, and import/export data by industry.

Local Statistics

Local Public Finance
From "Settlement Cards" and "Financial Situation Data Collections" published by the Ministry of Internal Affairs and Communications, ordinary account settlements, future burden status, and local public corporation status are included. Previous year's data is provided in October.

Prefectural Economic Accounts
Understand the economic conditions of prefectures, blocks, ordinance-designated cities, and other regions; the 93SNA public release, including old standards, is also included.

International Statistics

Overseas (IMF)
Covers "IFS (International Financial Statistics)" published by the IMF. Includes national income, prices, imports/exports, and financial data for IMF member countries.
