

## Geography, Environment, Sustainability Digital Archive

## An English-language scientific peer-reviewed journal

Published by the Russian Geographical Society, the Lomonosov Moscow State University Geography Department, and the Russian Academy of Sciences Institute of Geography, this scientific English-language journal aims to inform and cover the results of research and global achievements in the sphere of geography, environmental conservation and sustainable development.

The articles published in *Geography, Environment, Sustainability* are aimed at Russian and non-Russian scientists alike, while the interdisciplinary focus of the journal means that the subject matter will be of interest to a wide variety of scholars and researchers, including geographers; ecologists; specialists in environmental conservation, natural resource use and sustainable development; GIS specialists; cartographers; social and political geographers, etc.

The journal is organized according to the three major sections of geography, environmental science and sustainable development, and includes articles on environmental management; human geography; global and regional environmental and climate change; environmental regional planning; applied geographical and environmental studies; geo-informatics and environmental mapping; oil and gas exploration and environmental problems; nature conservation and biodiversity; and environment and health.
