

China Core Newspapers

Timely insights into almost every aspect of daily life in China

China Core Newspapers (CCND, 中国重要报纸全文数据库) is a full-text database that collects content from core newspapers published in mainland China, covering over 7 million articles since 2000. CCND selects newspapers with strong influence, high-quality reporting, and a wide range of readers, including central newspapers, industry and professional newspapers, and core government newspapers – over 650 titles in total.

Articles in CCND cover a wide range of topics, including domestic and international news, laws and regulations, guidelines and policies of the CPC, economic and industrial analysis, culture, and more. Offered via the China National Knowledge Infrastructure (CNKI, 中国知网) platform, CCND features multiple search methods, including basic, advanced, professional, sentence, and publication source. Users can navigate content using the 10 subject series navigation, or browse newspaper titles at the national and local level.

CCND features CNKI's Knowledge Network Node, with all articles linked to similar newspaper content, as well as similar content from academic journals, dissertations, theses, conference proceedings, yearbooks, etc.

China Core Newspapers is offered through East View's China Research Gateway.
Launched in 2022, China Research Gateway (CRG) transforms library access to Chinese resources by combining multiple databases into one package, supported by an accessible and user-friendly English-language portal. To learn more about CRG, please visit the CRG home page.
