More than numbers. Census data provides unparalleled insight into the lives of individuals. East View presents the Mexico 2010 Census as part of the East View Global Census Archive (GCA). The Mexico 2010 Census addresses a wide range of topics at the highest level of detail possible. Available for purchase, this is the premier source of demographic data for academic research.

Making information available. When initially acquired, the census data is stored in a complex database structure, with attribute descriptions in Spanish, limiting access to those with significant database management and programming experience. East View simplifies access, formatting the collection into an easy-to-use geodatabase which can be visualized using any GIS software and providing a comprehensive guide. Additionally, East View provides the original census documentation, allowing researchers to see first-hand how the data was gathered.
