

More than numbers. Census data provides unparalleled insight into the lives of individuals. East View presents the Chile 2017 Census as part of the East View Global Census Archive® (GCA). The Chile 2017 Census addresses a wide range of topics at the highest level of detail possible.

Making information available. When initially acquired, the census data is stored in a complex database structure, with attribute descriptions in Spanish, limiting access to those with significant database management and programming experience. East View simplifies access, formatting the collection into an easy-to-use geodatabase which can be visualized using any GIS software and providing a comprehensive guide. Additionally, East View provides the original census documentation, allowing researchers to see first-hand how the data was gathered.

Note: The Chile 2002 Census (GIS Edition) is also available through GCA
