More than numbers. Census data provides unparalleled insight into the lives of individuals. East View presents the El Salvador 2007 Census as part of the East View Global Census Archive® (GCA). The El Salvador 2007 Census addresses a wide range of topics at the highest level of detail possible.

Making information available. When initially acquired, the census data is stored in a complex database structure, with attribute descriptions in Spanish, limiting access to those with significant database management and programming experience. East View simplifies access, formatting the collection into an easy-to-use geodatabase which can be visualized using any GIS software and providing a comprehensive guide. Additionally, East View provides the original census documentation, allowing researchers to see first-hand how the data was gathered.

Notes
- Population Coverage % indicates the percentage of total population of the country during the census year that this census covers.
- Geography Coverage % indicates the percentage of the total area of the country covered by the ADM polygons in this census.
- Urban/FG indicates if this census provides Full Geographic (FG) coverage or if coverage is limited to Urban (U) or populated places.

DELIVERABLES

The El Salvador 2007 Census has 92.4% population coverage, over 300,000 data points, and consists of:

- **Geodatabase**
  - Intuitive organization of census data
  - Administrative boundary vector data at ADM 2 (Municipios) for 273 census units
  - Vector and aggregated tabular data at the Municipios level

- **Shapefiles**
  - All vector and census data in ESRI Shapefile format

- **Census Guide**
  - Detailed descriptions for 1,162 census variables

- **Original Census Documentation and Database**
  - Delivered in native format
  - Census questionnaires

- **Metadata**
  - Full attribute level metadata in FGDC ISO format
Below is a representative sample of census questions included in the El Salvador 2007 Census:
