

EAST VIEW GLOBAL CENSUS ARCHIVE®

A global aggregation initiative to collect the world's census data

A robust resource for scholars and analysts to find current and historic census data, including all available GIS data and published content that accompanies the release of a census.

In the first offering of its kind, East View presents the **GLOBAL CENSUS ARCHIVE®**, an innovative program to collect officially published census-related materials from around the world.

Since launching the inaugural Latin America Census Collection in 2018, East View has been working to collect hundreds of censuses and thousands of related volumes and materials from around the world.

This global collection contains GIS census data as well as all available published volumes, supporting questionnaires and other census ephemera. Each census comes with an East View-produced census bibliography, which serves as a finding aid and provides historical context.

CENSUS PUBLICATIONS

Every census has official authoritative elements that East View aggregates, processes and makes discoverable on an intuitive and easy-to-use eResources platform. While the availability and type of materials will vary by country, examples of typical materials include:

- **Census bibliography produced by East View**
- **Official Results (Analytical and Tabular)**
- **Maps / Atlases**
- **Methodology / Planning / Training**
- **Public Awareness**
- **Questionnaires / Survey Forms**
- **Census Bibliography**
- **Newspaper Articles**
- **Journal Articles**
- **Conference Materials**
- **Academic Books**
- **Video / Audio**
- **Legislative / Executive / Budgetary**

GIS & TABULAR DATA

East View's GIS census products offer the following:

- **Geodatabase**
 - Intuitive organization of census data
 - Administrative boundary vector data
- **Shapefiles**
 - All vector and census data in ESRI Shapefile format
- **Census Guide**
 - Detailed instructions on how to query and visualize data
 - Detailed descriptions of census variables
- **Original Census Documentation**
 - Delivered in native format
- **Metadata**
 - Full attribute level metadata in FGDC ISO format
