CAMBRIDGE ARCHIVE EDITIONS ONLINE: BALKANS, SLAVIC & CAUCASUS COLLECTION

The Cambridge Archive Editions (CAE) Balkan, Slavic & Caucasus Collection provides rich historical reference materials on political, territorial, and ethnic issues, and is now available online.

From the 16th century onward, Great Britain established consulates wherever possible. There were British officials throughout the Balkans, Caucasus, and other areas of Eastern Europe, all in an effort to further trade relations. The by-product was a steady stream of written information and observations on the national heritage and political developments of many countries, made at a local level. These reports were preserved as historically authentic documents in facsimile, as well as numerous maps.

Now, through collaboration between Cambridge University Press and East View, these materials are searchable and accessible in e-book form. Researchers will find that CAE's document-level citations and rich indexing has immeasurably enhanced the value and discoverability of the content in this collection.

The material is particularly rich for the study of boundary formation, claims and disputes, allowing users to easily find unique insight in maps, government documents, and more. Collection titles include:

East View delivers the most comprehensive collection of censuses from Russia and other post-Soviet states, including the first and last census of the Russian Empire in 1897, the first Ukraine population census of 2001, the regional census of Crimea in 2001, the first census of the Russian Federation in 2002, and the most recent Russian census of 2010.

In 2014, human migration from Ukraine to Russia, from Russia to the West, and, in the case of Russia, the annexation of territory, all resulted in significant changes in population. Add the dramatic decline of both countries' population due to lower birth rates, low life expectancies, and unhealthy lifestyles, and the sum of these factors are important in determining population in today's Russia and Ukraine.

RUSSIA AND THE MIDDLE EAST

A collection of articles and essays paints an intriguing portrait of Russia's Middle East vision and how it has developed over the last two decades. Carefully selected by Fyodor Lukyanov, editor in chief of the acclaimed journal *Russia in Global Affairs*, many of these pieces are written by officials who played a direct part in crafting Russian policy in this dynamic region: from the late Yevgeny Primakov, prime minister under both Yeltsin and Putin; to longtime Foreign Minister Sergei Lavrov, UN adviser Vladimir Orlov, and Energy Minister Aleksandr Novak.

RUSSIANS ON TRUMP: PRESS COVERAGE AND COMMENTARY

No relationship has been reported on or analyzed as much as the one between the US's 45th president and its former cold war rival. Now *Russians on Trump* gives you the perspective of the Russians themselves. News, analysis and commentary about Trump, drawn directly from the Russian press – before 2016, during the election campaign, and after his surprise win – fill crucial gaps in the knowledge of what the Trump-Russia relationship means to both sides.

WAR IN SYRIA

Fills a unique niche in political and military studies by presenting key events in the Syrian civil war – the deadliest conflict of the last 15 years – from a perspective that differs markedly from Western reportage.

BROTHERS ARMED: MILITARY ASPECTS OF THE CRISIS IN UKRAINE (SECOND EDITION)

Provides military context for and unprecedented detail about the strategic confrontation between Russia and Ukraine leading to the annexation of Crimea and outbreak of conflict in eastern Ukraine, bringing greater balance and detail, more candor and increased objectivity to a subject fraught with confusion, misunderstanding, and historical animosities.

TERRAIN ANALYSIS OF UKRAINE

This unique publication delivers a descriptive and visual geographic knowledge base of Ukraine's population, roads, topography and soils, hydrology, vegetation and climate. Where possible, East View has updated the reports with additional data from authoritative sources. Published in English for the first time, and supplemented with hundreds of full-color topographic and soil maps, this publication makes an abundance of detailed local geographic data accessible to a global audience.

STRATEGY

A translation of the second edition of Aleksandr Svechin's seminal work, *Strategy*. Svechin (1878-1938) was an outstanding Russian military theoretician and widely recognized as the "Soviet Clausewitz." This book, strongly influenced by the writings and analyses of the contemporary and classic European figures of Svechin's day, represents his concept of the best approach to national security for the Soviet state.

ACCESS YOUR ARCHIVES ONLINE

Today's students and faculty increasingly expect access to all the library's resources online at all hours of the day. It's in the DNA of libraries to provide their researchers with the best and most extensive access to information, but the nature of print or microform collections limits access to researchers unable to visit the library during open hours.

Librarians can now devote more time and energy to what they do best – preserving and promoting the intellectual output of their institution – with East View's service solutions, including digitization, preservation, conversion, hosting, and other value-added services.

Digitizing these unique collections helps libraries connect those resources with their researchers and researchers to your resources. Any content owned by the customer institution can be converted into a more accessible online resource through our comprehensive conversion service, which includes digitization and hosting.

East View, a trusted partner to academic libraries since 1989, offers an unmatched array of digital conversion and hosting services for libraries seeking to optimize their balance between physical and digital collections. Our extensive background in digitization's toughest terrain – converting primary source materials OCR'd in

non-Roman and Roman scripts into full-image scans with searchable full text – makes East View the ideal partner to help libraries define metadata character sets and special collections for area studies.

At East View we understand that each project is unique. Our library consultants will work with you to provide the appropriate level of solutions. We offer a full range of services for digital conversion and hosting, including:

ABOUT EAST VIEW

For over 30 years, East View has been providing high-quality information products and services in foreign languages and in English to a wide array of academic, commercial, and government customers throughout the world.

We started out small, back when the Cold War was ending and real and figurative walls were crumbling down. The secret military publication *Military Thought* was newly declassified, and we sought ways to make it generally available to the world. We obtained the rights and started down the path of becoming a provider of Slavic resources.

Thus East View was born, providing a glimpse of happenings in the East for those in the West.

As the USSR continued to disintegrate, East View became a reliable source for all things Russian for governments, international companies, librarians, researchers, and analysts.

We have striven to become your supplier of choice by offering more choices from Eastern Europe than any other company. Our suite of offerings include books from far flung regions, periodicals in print or online, research collections in any format, Universal Database online collections, and more. We also partner with other content providers, such as our partnership with Cambridge University Press to produce Cambridge Archive Editions Online.

Whether you seek best-sellers from Moscow, the latest census data from Kazakhstan, fine arts content from Prague, or legal information from Russia, East View already has it or can procure it. East View is committed to sourcing uncommon information from extraordinary places. Our Slavic offerings continue traditions started over three decades ago.

We look forward to serving you.
