OVERVIEW AND BACKGROUND

The 2002 Population and Housing Census in Cuba was carried out between September 7 and 16, 2002. It was the first census in over 20 years, as despite preparatory work already underway, Cuba's 1990 round census was not carried out due to the onset of economic crisis in the Special Period in the Time of Peace after the dissolution of the Soviet Union. Coverage of the census was as high as 99.83% of dwellings and 99.77% of the population. The National Statistical Office (ONE) established the methodological framework of the census through attendance of workshops in Colombia, Chile, Bolivia, and Mexico, where organizational support was provided by the UNFPA and CELADE. Statistics Canada provided training in the field of GIS. The UNFPA's financial assistance was significant in the completion of the census.
