Supporting area studies and advancing digital humanities with historical and current digital newspaper archives from around the world
The East View Global Press Archive® (GPA) is a groundbreaking program to create the most comprehensive collection of digital news sources from around the world. GPA is an outgrowth of a landmark initiative of Stanford Libraries and the Hoover Institution Library & Archives to digitally preserve and make more accessible thousands of original print newspaper publications collected by the Hoover Institution and now housed by Stanford Libraries.

For over 30 years, East View has been unlocking international news content and making it accessible to scholars across the globe. The GPA program continues this legacy by offering deep archives of a diverse range of predominantly non-Western newspaper titles, presented in full-image and full-text format on a customized platform specifically optimized for academic use.

Why Global Press Archive?

Current scholarship is hindered by a general lack in the availability and accessibility of non-Western content. GPA fills this gap by offering deep archives of a diverse range of titles, digitized to exacting standards and made searchable for increased discoverability.

In creating GPA, East View is committed to ensuring that these valuable resources are preserved for future generations of scholars and providing a maximally comprehensive and geographically diverse portfolio of resources.

GPA includes both stand-alone titles and databases aggregating multiple titles from a specific region and time period. Wherever possible, titles are presented in their complete runs from the first issue. Many of these newspapers are being made available digitally and as comprehensive archives for the first time and the effort will collectively present immense new value for scholarly research.

GPA is continuously growing and will ultimately include thousands of titles from across the globe in dozens of languages, representing a huge leap forward for Digital Humanities research.

GPA’s mission is to bring uncommon information from extraordinary places to academic markets through a program focused on Preservation, Digitization, Discovery, and Access.
